Global Landscapes Forum

# **Digital** Forum

Learn

ore than webinars, Global Landscapes Forum (GLF) Digital Forums are conversations where global leaders, experts and changemakers come together to discuss their knowledge and opinions on the world's most pressing development, environmental and social challenges. Through a live online platform, individuals from around the world can engage with speakers and each other to ask and answer questions, share solutions and unite in communities of practice, while **the archive** of past Digital Forums (formerly known as Digital Summits) allows listeners to tune in and learn, anytime and anywhere.

## Each GLF Digital Forum strives to achieve the following:

- Highlight and explore the importance of sustainable land use for every sector and industry;
- Deepen discussions and understanding of issues relating to the GLF's core themes: Rights, Food & Livelihoods, Restoration, Finance and Measuring Progress;
- Inspire and connect communities of practice around the world;
- Engage and inform more individuals through the sharing of knowledge.

### Format

A Digital Forum functions as a relaxed conversation among speakers led by a moderator, followed by live questions and feedback from an online audience.

### Sample outline:

- Topic introduction from the moderator
- Introduction questions or polls with the audience
- Speaker introductions from the moderator

- Statements from speakers
- Deep dive into topic driven by questions and shared experiences from the audience, moderator and speakers

Act

• Wrap-up from the moderator

#### **Technical details**

Share

 The summits are moderated on CrowdCast, an online tool compatible with any Internet browser. It simply requires participants to have a reliable Internet connection and working microphone and camera on their computer or tablet.

Conceptualize your Digital Forum with the GLF team. We will help organize, set-up and promote your Forum using our vast and engaged partner network. GLF content reaches over 2 million people per month on social media and past Digital Forums have seen over 300 participants.
